Note- Some conversion failures for these data sets could continue through mid-October

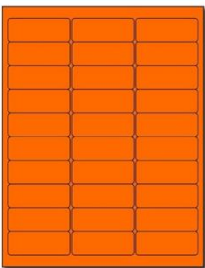

# Common Spirit Access beyond the APeX Go-Live

## Beginning Oct. 4

- After Epic goes live, end-user device access to CommonSpirit applications, including Cerner will be limited.
  - Select physicians, lab staff, and personnel will have edit access to finalize clinical documentation, enter lab results, etc. This ends 11/1/25, after which access will revert back to read only
  - All other staff will have read-only access.
  - Read only access will end around January of 2026, once our Archival system, Olah, becomes available
- Users must primarily rely on limited WOWs per floor, shared desktops, and one shared printer for their CommonSpirit application access and printing needs
- If you plan to access Cerner through your UCSF device via Citrix, please ensure your CommonSpirit Okta account is activated beforehand.
- For any Cerner/ CSH app-related issues, continue contacting the CommonSpirit Helpdesk at **888-307-0222**.

## How to identify a CommonSpirit device or workstation:

- Each CommonSpirit device will have an **orange** tag
- Additionally, signage will be displayed on computers and printers stating: *“This is a CommonSpirit Computer/ Printer”*
